

## Compliance Certificate

### Paxson Marketing Ltd

This is to confirm that iTech Labs has examined the casino game logs in the gaming system of **Paxson Marketing Ltd.** for the quarter ending September 2023 as recorded by the respective game servers. iTech Labs has calculated the Return To Player (RTP) for all the games using the data from the game logs. The table below lists the actual calculated RTPs for real money games played.

**Paxson Marketing Ltd.** game servers service the following internet gaming sites:  
[www.silversandscasino.com](http://www.silversandscasino.com), [www.jackpotcash.com](http://www.jackpotcash.com), [www.apolloslots.com](http://www.apolloslots.com),  
[www.whitelotuscasino.com](http://www.whitelotuscasino.com)

Game Type Description	RTP
Tri-Card Poker	98.83%
Roulette	97.07%
MultiHand Video Poker	97.04%
BlackJack	96.62%
Video Poker	95.79%
Let Em Ride	95.28%
Caribbean Draw	95.10%
Caribbean Hold'em	93.57%
Shooting Games	93.54%
Real-Series Video Slots	92.97%
Slots	89.05%
Lobby Jackpot	71.16%
Other games combined*	90.49%
All games combined	92.90%

\* Other games combined - includes 7 Stud Poker, Baccarat, Bingo Games, Board Games, Caribbean Stud, Keno, Scratch Cards, Slot Tournaments, Texas Hold'em Bonus Poker™, Vegas Three Card Rummy™, War

There were a large enough number of game records to give the RTP calculations sufficient statistical power<sup>1</sup>. The actual RTPs shown above are percentages of total actual winnings to bets for each game type. iTech Labs has done checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

iTech Labs certifies that the RTPs were calculated correctly from the game logs based on the actual bets and winnings and that the actual RTPs are greater than normally required by international gaming jurisdictions.

<sup>1</sup>The games included in the Other games combined category have insufficient data for the audit period.

### Paxson Marketing Ltd

This is to confirm that iTech Labs has examined the casino game logs in the gaming system of **Paxson Marketing Ltd.** for the quarter ending March 2021 as recorded by the respective game servers. iTech Labs has calculated the Return To Player (RTP) for all the games using the data from the game logs. The table below lists the actual calculated RTPs for real money games played.

**Paxson Marketing Ltd.** game servers service the following internet gaming sites:

[www.silversandscasino.com](http://www.silversandscasino.com), [www.jackpotcash.com](http://www.jackpotcash.com), [www.apolloslots.com](http://www.apolloslots.com),  
[www.whitelotuscasino.com](http://www.whitelotuscasino.com)

Game Type Description	RTP
MultiHand Video Poker	97.72%
Tri-Card Poker	97.46%
BlackJack	96.80%
Video Poker	96.23%
Roulette	95.62%
Vegas Three Card Rummy™	95.57%
Caribbean Hold'em	95.29%
Let Em Ride	94.91%
Real-Series Video Slots	93.27%
Texas Hold'em Bonus Poker™	92.52%
Caribbean Stud	91.48%
Caribbean Draw	91.47%
Keno	87.70%
Bingo Games <sup>2</sup>	86.52%
Slots <sup>3</sup>	86.31%
Scratch Cards <sup>4</sup>	85.96%
Shooting Games <sup>5</sup>	81.10%
Board Games <sup>6</sup>	79.18%
Other games combined*	39.06%
All games combined	93.38%

\*Other games combined - includes 7 Stud Poker, Baccarat, Craps, Slot Tournaments, Pai Gow Poker, European Slot Poker, Sic Bo, Red Dog and War.

There were a large enough number of game records to give the RTP calculations sufficient statistical power<sup>1</sup>. The actual RTPs shown above are percentages of total actual winnings to bets for each game type. iTech Labs has done checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

iTech Labs certifies that the RTPs were calculated correctly from the game logs based on the actual bets and winnings and that the actual RTPs are greater than normally required by international gaming jurisdictions.

<sup>1</sup>The games included in the Other games combined category have insufficient data for the audit period.

<sup>2</sup>Bingo games can have different RTPs and SDs. Assuming some typical values, this result is within a 95% confidence limit, so not statistically significant.

<sup>3</sup>Slots can have different RTPs and SDs. Assuming some typical values, this result is within a 95% confidence limit, so not statistically significant.

<sup>4</sup>Scratch Cards can have different RTPs and SDs. Assuming some typical values, this result is within a 95% confidence limit, so not statistically significant.

<sup>5</sup>We don't have any theoretical data on the Fish Catch shooting game. It is notable that the average bet per game is 224, so seems quite high. Assuming an RTP of 92% and a standard deviation of 3, this game would be paying within a 95% confidence limit, so not statistically significant. If Fish Catch is a skill game, RTP will be affected by player strategy.

<sup>6</sup>We don't have any theoretical data on the Banana Jones board game. Assuming an RTP of 92% and a standard deviation of 3, this game would be paying below a 95% confidence limit for the number of games played. If some games were of higher bet value than others, the higher bet games will give a wider variation than predicted by the above model. If Banana Jones is a game of skill, then sub-optimal strategy will reduce RTP.

### Paxson Marketing Ltd

This is to confirm that iTech Labs has examined the casino game logs in the gaming system of **Paxson Marketing Ltd.** for the quarter ending December 2020 as recorded by the respective game servers. iTech Labs has calculated the Return To Player (RTP) for all the games using the data from the game logs. The table below lists the actual calculated RTPs for real money games played.

**Paxson Marketing Ltd.** game servers service the following internet gaming sites:  
[www.silversandscasino.com](http://www.silversandscasino.com), [www.jackpotcash.com](http://www.jackpotcash.com), [www.apolloslots.com](http://www.apolloslots.com),  
[www.whitelotuscasino.com](http://www.whitelotuscasino.com)

Game Type Description	RTP
BlackJack	97.80%
Caribbean Hold'em	97.27%
Sic Bo	96.81%
Tri-Card Poker	96.78%
Video Poker	96.56%
Caribbean Draw	96.42%
Roulette	96.38%
Let Em Ride	95.85%
MultiHand Video Poker	95.56%
Caribbean Stud	95.08%
Vegas Three Card Rummy™	94.99%
Texas Hold'em Bonus Poker™	94.61%
Real-Series Video Slots	93.69%
Scratch Cards	93.64%
Bingo Games	92.04%
Slots	90.66%
Shooting Games <sup>1</sup>	83.96%
Board Games <sup>1</sup>	81.11%
Keno <sup>1</sup>	80.45%
Other games combined*	66.83%
All games combined	93.85%

\*Other games combined - includes 7 Stud Poker, Baccarat, Craps, Slot Tournaments, Pai Gow Poker, European Slot Poker, Red Dog, Roulette Multiplayer and War.

There were a large enough number of game records to give the RTP calculations sufficient statistical power<sup>2</sup>. The actual RTPs shown above are percentages of total actual winnings to bets for each game type. iTech Labs has done checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

iTech Labs certifies that the RTPs were calculated correctly from the game logs based on the actual bets and winnings and that the actual RTPs are greater than normally required by international gaming jurisdictions.

<sup>1</sup>The result for each of the game types is within 95% confidence limits based on assumptions and provided information:

- Board games pay around 81%.
- Keno games pay around 80%.
- Shooting games pay around 95%. Shooting games have very low games this period. The result is within confidence due to low games played.

<sup>2</sup>The games included in the Other games combined category have insufficient data for the audit period.

### Paxson Marketing Ltd

This is to confirm that iTech Labs has examined the casino game logs in the gaming system of **Paxson Marketing Ltd.** for the quarter ending March 2020 as recorded by the respective game servers. iTech Labs has calculated the Return To Player (RTP) for all the games using the data from the game logs. The table below lists the actual calculated RTPs for real money games played.

**Paxson Marketing Ltd.** game servers service the following internet gaming sites:

[www.silversandscasino.com](http://www.silversandscasino.com), [www.jackpotcash.com](http://www.jackpotcash.com), [www.apolloslots.com](http://www.apolloslots.com),  
[www.whitelotuscasino.com](http://www.whitelotuscasino.com)

Game Type Description	RTP
Scratch Cards <sup>1</sup>	101.91%
Roulette	97.64%
BlackJack	97.54%
Shooting Games	97.03%
Craps	96.78%
Tri-Card Poker	96.42%
Let Em Ride	95.35%
Video Poker	95.26%
Bingo Games	95.25%
Vegas Three Card Rummy™	94.46%
MultiHand Video Poker	94.36%
Texas Hold'em Bonus Poker™	94.24%
Caribbean Hold'em	93.53%
Real-Series Video Slots	93.26%
Caribbean Stud	92.09%
Slots	89.00%
Board Games	85.35%
Keno	77.35%
Other games combined*	108.08%
All games combined	93.44%

\* Other games combined - includes 7 Stud Poker, Baccarat, Caribbean Draw, Sic Bo, Pai Gow Poker, European Slot Poker, Red Dog, Roulette Multiplayer and War.

There were a large enough number of game records to give the RTP calculations sufficient statistical power<sup>2</sup>. The actual RTPs shown above are percentages of total actual winnings to bets for each game type. iTech Labs has done checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

iTech Labs certifies that the RTPs were calculated correctly from the game logs based on the actual bets and winnings and that the actual RTPs are greater than normally required by international gaming jurisdictions.

<sup>1</sup>Scratch Cards RTP is greater than 100%. This period RTPs do look much wider spread than previous quarter results, which could be attributable to randomness and some high wins/losses. Observe game(s) over next few quarters to be confident of long term averages.

<sup>2</sup>The games included in the Other games combined category have insufficient data for the audit period.

### Paxson Marketing Ltd

This is to confirm that iTech Labs has examined the casino game logs in the gaming system of **Paxson Marketing Ltd.** for the quarter ending June 2018 as recorded by the respective game servers. iTech Labs has calculated the Return To Player (RTP) for all the games using the data from the game logs. The table below lists the actual calculated RTPs for real money games played.

**Paxson Marketing Ltd.** game servers service the following internet gaming sites:

[www.silversandscasino.com](http://www.silversandscasino.com), [www.jackpotcash.com](http://www.jackpotcash.com), [www.apolloslots.com](http://www.apolloslots.com),  
[www.whitelotuscasino.com](http://www.whitelotuscasino.com)

Game Type Description	RTP
Scratch Cards <sup>1</sup>	101.81%
Caribbean Stud	98.07%
Vegas Three Card Rummy?	97.79%
MultiHand Video Poker	97.36%
BlackJack	97.30%
Texas Hold'em Bonus Poker?	96.90%
Sic Bo	96.65%
Tri-Card Poker	96.19%
Roulette	96.19%
Caribbean Hold'em	95.39%
let them ride	95.12%
Video Poker	94.44%
Bingo Games	94.23%
Craps	93.81%
Real-Series Video Slots	93.73%
Carribbean draw	92.81%
Slots	90.07%
Roulette Multiplayer	87.28%
Keno	78.86%
Other games combined*	95.17%
All games combined	93.98%

\* Other games combined - includes Baccarat, Pai Gow Poker, European Slot Poker, Red Dog and War.

There were a large enough number of game records to give the RTP calculations sufficient statistical power<sup>2</sup>. The actual RTPs shown above are percentages of total actual winnings to bets for each game type. iTech Labs has done checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

iTech Labs certifies that the RTPs were calculated correctly from the game logs based on the actual bets and winnings and that the actual RTPs are greater than normally required by international gaming jurisdictions.

<sup>1</sup>Scratch Cards RTP is greater than 100%. Game 2501 appears to have won the highest prize during June 2018, so this result, the combined results for game 2501 over 3 months, and the total for all scratch games in 3 months show above typical values. Previous scratch card combined 3 month RTPs show no previous fault. Conclusion is that the game(s) are performing normally, and that the highest prize has been won in game 2501 during June 2018 which has skewed game stats. We recommend monitoring the game in the next period for any duplication of this result (which would be statistically unlikely).

<sup>2</sup>The games included in the Other games combined category have insufficient data for the audit period.

All games combined	94.00%

\* Other games combined - includes Baccarat, Craps, European Slot Poker, Pai Gow Poker, Red Dog, Sic Bo and War.

There were a large enough number of game records to give the RTP calculations sufficient statistical power<sup>1</sup>. The actual RTPs shown above are percentages of total actual winnings to bets for each game type. iTech Labs has done checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

iTech Labs certifies that the RTPs were calculated correctly from the game logs based on the actual bets and winnings and that the actual RTPs are greater than normally required by international gaming jurisdictions.

<sup>1</sup> The games included in the Other games combined category have insufficient data for the audit period.

### Paxson Marketing Ltd

This is to confirm that iTech Labs has examined the casino game logs in the gaming system of **Paxson Marketing Ltd.** for the quarter ending September 2015 as recorded by the respective game servers. iTech Labs has calculated the Return To Player (RTP) for all the games using the data from the game logs. The table below lists the actual calculated RTPs for real money games played.

**Paxson Marketing Ltd.** game servers service the following internet gaming sites:

[www.silversandscasino.com](http://www.silversandscasino.com), [www.jackpotcash.com](http://www.jackpotcash.com)

Game Type Description	RTP
Caribbean draw <sup>1</sup>	128.26%
Caribbean Hold'em	98.39%
Vegas Three Card Rummy	98.00%
Roulette	97.30%
BlackJack	97.01%
let them ride	96.50%
Video Poker	96.43%
Tri-Card Poker	96.07%
MultiHand Video Poker	95.52%
Texas Hold'em Bonus Poker	94.93%
Caribbean Stud	94.27%
Scratch Cards	93.36%
Real-Series Video Slots	93.26%
Bingo Games	92.92%
Roulette Multiplayer	90.99%
Slots	89.05%
Keno	71.25%
Other games combined*	88.23%
All games combined	93.85%

\* Other games combined - includes Baccarat, Craps, European Slot Poker, Pai Gow Poker, Red Dog, Sic Bo and War.

There were a large enough number of game records to give the RTP calculations sufficient statistical power<sup>2</sup>. The actual RTPs shown above are percentages of total actual winnings to bets for each game type. iTech Labs has done checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

iTech Labs certifies that the RTPs were calculated correctly from the game logs based on the actual bets and winnings and that the actual RTPs are greater than normally required by international gaming jurisdictions.

<sup>1</sup> \*For this audit period Caribbean draw has RTP higher than normally required by international gaming jurisdictions due to insufficient data.

<sup>2</sup> The games included in the Other games combined category have insufficient data for the audit period.

### Paxson Marketing Ltd

This is to confirm that iTech Labs has examined the casino game logs in the gaming system of **Paxson Marketing Ltd.** for the quarter ending March 2015 as recorded by the respective game servers. iTech Labs has calculated the Return To Player (RTP) for all the games using the data from the game logs. The table below lists the actual calculated RTPs for real money games played.

**Paxson Marketing Ltd.** game servers service the following internet gaming sites:  
[www.silversandscasino.com](http://www.silversandscasino.com), [www.jackpotcash.com](http://www.jackpotcash.com)

Game Type Description	RTP
Baccarat <sup>1</sup>	104.59%
Tri-Card Poker	99.16%
Caribbean draw	98.84%
MultiHand Video Poker	98.28%
Caribbean Hold'em	98.23%
Vegas Three Card Rummy	97.34%
BlackJack	96.82%
Roulette Multiplayer	96.79%
Video Poker	96.08%
Roulette	95.96%
let them ride	95.80%
Caribbean Stud	93.89%
Real-Series Video Slots	93.50%
Texas Hold'em Bonus Poker	92.01%
Slots	91.66%
Bingo Games	91.53%
Scratch Cards	90.44%
Other games combined*	82.15%
All games combined	93.87%

\* Other games combined - includes Craps, European Slot Poker, Keno, Pai Gow Poker, Red Dog, Sic Bo and War.

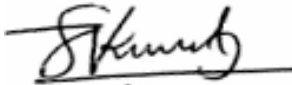

There were a large enough number of game records to give the RTP calculations sufficient statistical power<sup>2</sup>. The actual RTPs shown above are percentages of total actual winnings to bets for each game type. iTech Labs has done checks to verify the integrity of the game logs. iTech Labs also maintains a copy of the game logs for verification purposes.

iTech Labs certifies that the RTPs were calculated correctly from the game logs based on the actual bets and winnings and that the actual RTPs are greater than normally required by international gaming jurisdictions.

<sup>1</sup> iTech Labs has chosen a 95% confidence measure for 'statistical significance'. Based on this measure, statistically significant variations would be expected to appear 5% of the time without indicating any serious problem with RTPs. iTech Labs recommends games with statistically significant variations are reviewed again during the next audit to verify that the same variations are not recurring, which may then indicate a problem.

<sup>2</sup> The games included in the Other games combined category have insufficient data for the audit period.
