Random Number Generator Certificate

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) by SM Software Technology and found that the RNG complies with the relevant standards.*

Software provider: SM Software Technology
Software provider URL: http://komplex.bet

The RNG uses a well-known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

 iTech Labs has evaluated scaling for Race games.

The scaling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the number are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

*The RNG was tested according to Isle of Man standards

Disclaimer.
While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
