

Random Number Generator Certificate

Operator: Vegas™ Official License by C-Byte™

Operator URL: www.c-byte.us.com

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) used by Vegas License International LLC a C-Byte Company, Inc. (C-Byte) and found that the RNG complies with the relevant standards.*

The RNG implementation by C-Byte uses a hardware generator. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated the scaling for slot games for C-Byte. The scaling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

iTech Labs Australia

10 May 2012

* The RNG was tested according to Isle of Man Gambling Supervision Commission, UK Gambling commission and Malta standards.

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
