

## Random Number Generator Certificate

This is to certify that iTech Labs has evaluated the Random Number Generator (RNG) by GamePoint and found that the RNG complies with the relevant standards.\*

**Operator:** GamePoint

**Operator URL:** [www.gamepoint.com](http://www.gamepoint.com)

The RNG uses a well known algorithm to generate random numbers. The numbers generated by this RNG have passed Marsaglia's "diehard" tests for statistical randomness.

iTech Labs has evaluated shuffling for single deck of cards (without jokers). iTech Labs has also conducted scaling tests for Dice games (Backgammon and Royal dice) and Bingo games. The shuffling and scaling tests were conducted on large enough samples to give the calculations sufficient statistical power.

iTech Labs has found that the card/number sequences are unpredictable, non-repeatable and uniformly distributed.

The certified code for the RNG has been fingerprinted.

\*The RNG was tested according to Isle of Man standards

Disclaimer.

While it is not possible to test all possible scenarios in a laboratory environment, iTech Labs has conducted a level of testing appropriate for a component test of this type.
